Identity and Access Control Standard - Extract

Document ID: E04 / IAS-2026-03 | Supplier: Cedarline Analytics Ltd | Issued: 8 March 2026

FICTIONAL training material. All organisations, statements, evidence and dates in this case are simulated.

4.1 Administrative access

Multi-factor authentication (MFA) is mandatory for privileged administrative accounts accessing production services.

4.2 Non-privileged workforce and service accounts

Non-privileged workforce accounts are subject to phased MFA rollout. Shared service accounts are permitted by exception until retirement of the legacy invoicing connector, subject to compensating monitoring.

4.3 Exceptions register

Exception ID	Description	Target close
IAM-EX-17	Legacy reconciliation integration account; password authentication	31 December 2026

Evidence citation anchor

E04 page 1, sections 4.1-4.3. Questionnaire says MFA is enforced for every workforce and privileged account.
